POLICY AND STANDARDS FOR PLANTING YOUNG STREET TREES

I. Tree Placement and Spacing Standards

- A. Streets without Planting Strips (without sidewalks):
1. Check with DPW for sidewalk or curbing plans.
 2. Locate trees as far as possible from road edge but no closer than 2 feet from Right-of Way edge.
- B. Streets with Planter Strips (sidewalks) without curbs:
1. Minimum planter strip width approximately 8' – varies with planting strip condition and width stability.
- C. Streets with Planter Strips, Sidewalks, and Curbs:
1. Minimum planter strip width 4'.
- D. Minimum Distances from Structures, Intersections, Utilities and other fixtures
1. Curbing 2'
 2. Sidewalks 2'
 3. Driveways 8'
 4. Sewer lines 5'
 5. Water lines 5'
 6. Gas lines 5'
 7. Underground Electric or Cable lines 5'
 8. Fire Hydrants 10'
 9. Street Lights 25-35'
 10. Traffic Control Signs 30'
 11. Residential Street Intersections 30'
 12. Major Street Intersections 50'
 13. Structural Walls 10'
- E. Tree placement with respect to Utility wires and poles
1. Street Side wires (pole to pole): only low growing trees will be planted under primary electrical wires
 2. Utility Service wires (pole to house): 3' minimum offset.
 3. Utility Poles: 10' minimum offset
- F. Spacing between young trees based on size at maturity:
1. Large Growing Trees 50' Ideal, 40' minimum
 2. Medium Growing Trees 40' Ideal, 30' minimum
 3. Low Growing Trees 30' Ideal, 20' minimum

II. Species Restrictions

There will be no use of fast-growing, brittle-wooded trees species or trees that block visibility in City Right-of-Ways. The following species cannot be planted on City Right-of-Ways:

- A. Poplar species – *Populus spp.*
